

# MarQuip

Exclusive yacht exhausts,  
expertly engineered  
and integrated

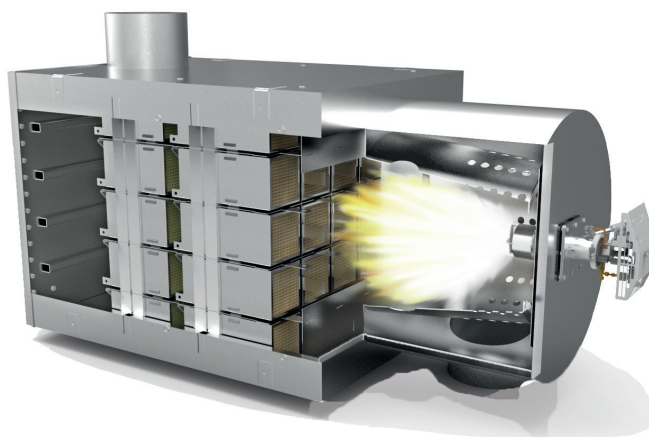

**Emission control**

## Being green has never been so important

**We have a good working relationship with a number of quality suppliers and can deliver a filter that is ideal for your needs. MarQuip does not discriminate among brands: we will offer you the type and make best suited to your requirements and make it an integral part of the complete exhaust system.**

Passive and active soot filters can be integrated inside silencers, and exhaust systems can be optimised by the integration of a soot filtration system. This makes it unnecessary to choose between noise or emission reduction. With MarQuip, ensuring good filtration does not mean compromising on noise attenuation.

Emission control

Our quality suppliers provide an array of solutions for emission reductions, which include:

- Soot
- Carbon monoxides
- Hydrocarbons
